RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 184 pages. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1991 edition. Excerpt: . . . use, and other backcountry recreation; petroleum operations; road construction; agriculture and urbanization; and other human activities (FGFWFC 1985; USFWS 1987a). Studies of disturbance effects on another subspecies of *Felis concolor* in Arizona and Utah found that resident mountain lions altered their home range and home area to avoid logging activity and logged areas (Van Dyke 1983; Van Dyke et al. 1986). Further, the mountain lions altered their activity patterns to avoid human contact by shifting their peak activity to periods of darkness and avoiding the normal peaks of dawn and dusk. Lions appeared to select home ranges where timber sale areas were absent, road densities were lower than average, and there were few or no permanent human disturbance sites, such as residences. The study concluded: First, areas that experience permanent or repeated habitat alteration are reduced in quality to the lion population, even if human residence, presence, or activity is temporary. Second, areas where there is continuing, concentrated human presence or residence are essentially lost to the lion population, even if there is little impact on the habitat itself (Van Dyke et al. 1986). This indicates a very low tolerance to human activity by western panthers, and Florida panthers may share this sensitivity. While no similar work has been done with Florida panthers, recent analysis by the Florida Game and Fresh Water Fish Commission of past telemetry data on Florida panther movements indicates that panthers tend to leave the Bear Island unit in the preserve during hunting season (letter from...
