For some years I have thought that a paper on this subject would be interesting and possibly somewhat instructive, and because of the fact that during all this time I have never heard a paper on this subject read, and not because I feel that I can begin to do the subject justice I present this effort for your consideration and discussion. I feel and I have often felt that there are some points on which the profession, or at least members of the profession, are not quite entirely clear, or if others are clear that sometimes they have either overlooked them or have ignored them either intentionally or unintentionally. Ethics is denned by Webster as the science of human duty, and medical ethics as a particular system...
